Executive Summary

The portfolio currently manages INR 16.51 billion in assets and has disbursed INR 33.43 billion to date, indicating a strong capital deployment ratio. Asset quality is mixed: the entire AUM appears across all overdue buckets, and the number of accounts past due 90 days ranges from 6 to 12 in the eight states tracked, suggesting localized stress but no systemic concentration. Collection efficiency has remained relatively flat over the past twelve months, hovering between 220000 and 250000 units each month, reflecting consistent recovery performance. Future projections show the AUM holding steady at INR 16.51 billion, with no additional principal forecasted, implying a neutral growth outlook. Overall, the portfolio is financially robust with stable disbursement and recovery trends, though attention to the 90-plus PAR concentrations in specific states is warranted.
