Slide Insights

- The portfolio's asset base is heavily weighted toward performing assets, with the PAR 0 bucket representing INR 308.75, while the high?risk PAR 90+ bucket comprises only INR 13.20.
- Geographic risk concentration is evident, as Himachal Pradesh registers the highest number of PAR 90+ accounts at 12, closely followed by Kerala with 11 such accounts.
- Overall portfolio quality remains strong, but targeted monitoring and mitigation efforts should focus on the limited high?PAR exposure, particularly in the identified states.

Slide Insights

- Collection efficiency fell from 96.9 percent to 86.2 percent month-over-month, indicating a weakening in cash capture.
- Quarterly disbursements dropped sharply, decreasing from 883,884 INR in Q1 to 255,321 INR in Q4.
- The concurrent declines suggest rising pressure on liquidity and highlight the need for tighter credit and collection controls.
